

Equipment Datasheet — 100-E-108

Preheat Train Exchanger | CDU Unit

Document ID	DS-100-E-108
Equipment Tag	100-E-108
Equipment Name	Preheat Train Exchanger
Process Unit	Crude Distillation Unit (100)
Manufacturer	Mather+Platt
Install Date	2005-02-13
Design Pressure	52.6 barg
Design Temperature	319.7 degC
Material of Construction	Duplex Stainless Steel
Criticality Rating	High
Governing SOP	SOP-100-002
Governing Safety Procedure	SP-005

1. Equipment Description

100-E-108 is a Preheat Train Exchanger installed in the Crude Distillation Unit (CDU) at PRPC. It was supplied by Mather+Platt and commissioned on 2005-02-13. The equipment is classified as High criticality within the unit's reliability programme.

2. Design Basis

Design pressure is rated at 52.6 barg with a design temperature of 319.7 degC. Primary material of construction is Duplex Stainless Steel, selected for compatibility with process fluid composition and corrosion allowance requirements specific to CDU service.

3. Operating & Safety References

Operation of 100-E-108 is governed by procedure SOP-100-002 (Atmospheric Distillation Column Operation). Isolation and personnel safety during maintenance follow SP-005 (Working at Height on Structures and Columns).

4. Maintenance Philosophy

100-E-108 is included in the CDU rotating/static equipment reliability programme with scheduled preventive maintenance and risk-based inspection (RBI) intervals determined by criticality rating (High).
