

Equipment Datasheet — 300-C-303

Instrument Air Compressor | UTIL Unit

Document ID	DS-300-C-303
Equipment Tag	300-C-303
Equipment Name	Instrument Air Compressor
Process Unit	Utilities & Offsites (300)
Manufacturer	Triveni Turbines
Install Date	2015-03-05
Design Pressure	119.9 barg
Design Temperature	456.6 degC
Material of Construction	Cast Iron
Criticality Rating	High
Governing SOP	SOP-300-007
Governing Safety Procedure	SP-008

1. Equipment Description

300-C-303 is a Instrument Air Compressor installed in the Utilities & Offsites (UTIL) at PRPC. It was supplied by Triveni Turbines and commissioned on 2015-03-05. The equipment is classified as High criticality within the unit's reliability programme.

2. Design Basis

Design pressure is rated at 119.9 barg with a design temperature of 456.6 degC. Primary material of construction is Cast Iron, selected for compatibility with process fluid composition and corrosion allowance requirements specific to UTIL service.

3. Operating & Safety References

Operation of 300-C-303 is governed by procedure SOP-300-007 (Package Boiler Startup and Water Treatment). Isolation and personnel safety during maintenance follow SP-008 (Chemical Handling and Spill Response - ETP).

4. Maintenance Philosophy

300-C-303 is included in the UTIL rotating/static equipment reliability programme with scheduled preventive maintenance and risk-based inspection (RBI) intervals determined by criticality rating (High).
